## SKILLS & WORKMANSHIP

## PROFESSIONAL PROFILE

Extensive professional experience on graphic and web design area, printing and jewelry. I know the whole production process in graphic arts. I've been working in other areas that include print features, finishes, warehouse management, purchasing and logistics in several sectors. My work has also been linked to engraving of trophies and all kind of jewelry. The last years I've been largely devoted to work in design and web programming, applications for mobile. I consider myself a hard good worker, imaginative, creative, positive person, always i have fun with my work; efficient, responsible, tidy and clean; with ability to solve problems. Aware of the needs of costumers and with an excellent attention and service, I'm strictly with time schedules and the implementation of the projects. Entrepreneur with initiative to organize and management capacity, able to lead, coordinate and motivate teams. Always willing to learn and share knowledge and abreast of current trends, technology, tools, programs and techniques in graphic and web design.

# ABOUT ME

Personally, I would define me as a very curious person, I like a lot to travel and learn about cultures, way of life, talk with people, gastronomy and history of the places I visit. I love nature, animals and I love the sea and I try to live always near the sea. I practice sports such as soccer, basketball, diving, tennis, running, mountain bike. I love literature and I usually read history books, or mystery, horror, adventure, science fiction novels, and I'm also a cinema lover and tv series are another of my passions. But for my one of the most important things is music, I think that not I could live without music. I like to be informed about what happens in this global world, reader of blogs, magazines and webs, current about new advances in mystery, science and technology.
